NMS Communications Powers CreaLog's Award-Winning Interactive Video Response Solution

Monday April 24, 8:00 am ET

FRAMINGHAM, Mass.--(BUSINESS WIRE)--April 24, 2006--NMS Communications (NASDAQ: [NMSS](#) - [News](#)), a leading provider of communications technologies and solutions for converged and mobile networks, today announced CreaLog, a leading provider of voice and video portal solutions, is using NMS's Open Access video platform (www.nmscommunications.com/openaccess) to power its CreaVoice Interactive Video Response solution. Last month, CreaVoice captured the "Best of CeBIT Award 2006" in the speech processing category.

CreaVoice allows popular applications like video conferencing, video chat, video voicemail and video streaming to be controlled by speech. Using either spoken input or touchtone to navigate in real time through the application, the caller can both hear results and see them displayed on their mobile phone screen. According to Teletalk magazine, CreaVoice was selected for the best of CeBIT award for having an extremely innovative solution that merges traditional voice portal technology and interactive video telephony.

CreaVoice is powered by NMS's CG 6565 video platform. The CG 6565 is an ideal platform for scalable and highly-reliable telephony and video solutions such as the CreaVoice Interactive Video Response solution.

"CreaLog solutions have a reputation for excellence, and this is the second consecutive year that CreaLog has won the Best of CeBIT Award," said Michael Kloos, managing director of CreaLog. "To ensure we continue to produce truly best-of-breed solutions, we rely on partners like NMS to deliver leading-edge voice and video technology."

"Our CG 6565 is a very rich but easy-to-use development platform. Thanks to this ease of use, CreaLog was able to bring the award-winning CreaVoice solution to market within a very short period of time," said John Orlando, chief marketing officer for NMS. "CreaLog seeks out true industry leaders to power its solutions, and we look forward to continuing our long-standing partnership with the company."

About CreaLog

CreaLog GmbH, a leading provider of voice portal solutions, has many years of experience with natural-language voice portals in Europe, with more than 300 customers across 30 industries. CreaLog received the "Best of CeBIT" Award in 2005 and 2006 for outstanding excellence with its "speech processing" solutions.

Statements in this document expressing the beliefs and expectations of management regarding future performance are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on management's expectations as of the date of this document and are subject to uncertainty and changes in circumstances. Actual results may differ materially from these expectations due to risks and uncertainties including, but not limited to, uncertainty in communications spending, the implementation of the Company's strategic repositioning and market acceptance of the Company's new solutions strategy, quarterly fluctuations in financial results, the Company's ability to exploit fully the value of its technology and its strategic partnerships and alliances, the availability of products from the Company's contract manufacturer and product component vendors and other risks. These and other risks are detailed from time to time in the Company's filings with the Securities and Exchange Commission, including the Company's annual report on Form 10-K for the year ended December 31, 2005. In addition, while management may elect to update forward-looking statements at some point in the future, management specifically disclaims any obligation to do so, even if its estimates change. Any reference to our website in this press release is not intended to incorporate the contents thereof into this press release or any other public announcement.
